

# UniClean America

## FEATURES AND BENEFITS

- Effective freezing point depression and corrosion protection.
- Excellent stability with hard water, preventing sludge formation.
- Compatibility with seals and gaskets, ensuring system integrity.
- Free from silicates, phosphates, amines, and borates, promoting environmental safety.
- Synergistic metal protection with our CWT COOL TREAT NCLT, safeguarding against corrosion.
- Specifically engineered for aluminum cylinder head protection and resistance against foaming.

## ANTIFREEZE/COOLANT CONCENTRATE

### PRODUCT DESCRIPTION:

Discover the exceptional capabilities of ANTIFREEZE COOLANT, a specially formulated liquid based on monoethylene glycol. Engineered to lower the freezing point of cooling water, this versatile coolant offers unparalleled protection against freezing and corrosion. Perfect for internal combustion engine cooling systems and a wide range of heat transfer applications, ANTIFREEZE COOLANT ensures your systems run efficiently and remain safeguarded in the harshest conditions. Embrace the reliability and superior performance of a product designed to keep your equipment in optimal condition year-round.

### DIRECTIONS FOR USE

ANTIFREEZE COOLANT is recommended for nearly all types of cooling systems, including those constructed from cast iron, aluminum, or their combinations. It is suitable for year-round use and should be diluted with high-quality makeup water according to the following guidelines:

- For protection down to  $-5^{\circ}\text{C}$ , mix 1 part coolant with 3 parts water.
- For protection down to  $-10^{\circ}\text{C}$ , mix 1 part coolant with 2 parts water.
- For protection down to  $-20^{\circ}\text{C}$ , mix 1 part coolant with 1 part water.
- For protection down to  $-40^{\circ}\text{C}$ , use the coolant undiluted.

### PHYSICAL PROPERTIES:

Appearance:	Red
Density [g/ml]:	1.11
Form:	Liquid
PH::	8.7
