UniClean America

Organic Cleaning Agent

Organic based – non hazard

- Special cleaning spray for all test equipment from UniClean America
- Also usable for other makers devices
- Organic production
- Non-chemical
- Renewable resources
- No danger for environment and crew
- No hazard statements required

The Cleaning Agent is a non-classified, waterfree cleaner for all UniClean America test devices. Especially the new formula which is organic produced will help to protect environment and crew.

By using the Organic Cleaning Agent the test devices are cleaned in a most mild way and helping the operator to keep the equipment operational at any time.

Original parts of UniClean America and following the hints provided in the instructions of the test equipment will help the user to make the devices a long lasting tool for the oil management on site.
