Organic WiO Reagent Set

Organic based - Water-in-Oil testing

- Reagent for water-in-oil test (two components)
- Regenerative and organic production of WR Releaser
- Non-chemical Releaser
- Renewable resources
- No danger for environment and crew
- No hazard statements required
- Non-hazardous for transport and storage (certified by DEKRA Industrial GmbH)

Especially the new formula of the Organic Releaser which is of organic production will help to protect environment and crew. As long as the components are not mixed they are classified as non-dangerous for transport and storage.

The reagent can be prepared for instant use in portions for a small number of tests, which is advantageous for maintenance personnel, or it can be mixed in one, if needed in one place.

Order No.: 1885 | 40 tests / 430ml + 75g Tube
