

UniClean America

FEATURES AND BENIFITS

- **Formulation:** A carefully blended solution of polyphosphates, dispersible in water.
- **Dosage:** Varies between 15 – 40 mg/l for standard water treatment. Adjustments may be needed for specific applications.
- **Compliance:** Meets the requirements of international health and safety standards.
- **Polyphosphate Power:** Utilizes the best properties of each ingredient for maximum effectiveness.
- **Corrosion and Scale Prevention:** Protects against "red water" and other scale-related issues.
- **High-Temperature Stability:** Effective at temperatures up to 80°C.
- **Enhanced Water Quality:** Keeps potable water systems free from impurities and corrosion.
- **Extended System Life:** Increases the longevity of pipelines and equipment, reducing maintenance costs.
- **Versatile Use:** Suitable for a wide range of applications in both potable and domestic water systems.
- **Cost-Effective:** Economical solution for maintaining water system integrity.

UCA+ POTABLE WATER STABILIZER

PRODUCT DESCRIPTION:

Introducing UCA+ POTABLE WATER STABILIZER, the ultimate solution for maintaining the purity and integrity of potable water systems. This innovative formula combines the power of polyphosphates to deliver exceptional scale and corrosion control, ensuring your water remains clean and safe for consumption. Designed for efficiency and ease of use, UCA+ POTABLE WATER STABILIZER is perfect for all shipboard once-through water systems.

APPLICATIONS:

- **Potable Water Systems:** Ensuring clean, safe drinking water by preventing scale and corrosion.
- **Shipboard Water Systems:** Providing effective treatment for domestic water systems on ships.
- **Pipeline Protection:** Controlling corrosion in pipelines and equipment handling softened

DIRECTIONS FOR USE

1. **Determine Dosage:** Use between 15 – 40 mg/l for ordinary water treatment (approximately 0.4 – 1.0 liters per 25 metric tons of water). Adjust dosage for specific applications as needed.
2. **Application:** UCA+ POTABLE WATER STABILIZER can be fed into the system using a simple by-pass feeder or similar equipment. Ensure the treatment is proportioned to maintain the desired dosage.
3. **Monitoring:** Regularly monitor water quality and adjust dosage as necessary to ensure optimal performance.

Choose UCA+ POTABLE WATER STABILIZER for reliable, efficient, and cost-effective protection of your potable water systems. Ensure the highest standards of water quality and system longevity with our advanced stabilizing solution.

PHYSICAL PROPERTIES:

Appearance:	Clear Liquid
Corrosive Action:	Non Corrosive to ordinary Metals
Density [g/ml]:	1.1-1.25
Form:	Liquid
PH:	7
