

UniClean America

FEATURES AND BENIFITS

- Breaks down stubborn mineral and inorganic deposits.
- Helps restore flow in blocked or restricted drainage systems.
- Dissolves water scale, lime deposits, and mineral buildup.
- Helps remove rust deposits from compatible drainage pipes.
- Suitable for sanitation and black-waste drainage applications.
- Delivers strong cleaning performance for demanding blockages.
- Begins working quickly on deposits inside the drain line.
- Helps minimize mechanical cleaning and dismantling.
- Suitable for marine, industrial, and commercial drainage systems.
- Formulated and engineered in the USA.

UN Number: UN 1789

UCA+ ACIDIC DRAIN OPENER

PRODUCT DESCRIPTION:

UCA+ ACIDIC DRAIN OPENER is a heavy-duty, super-concentrated acidic liquid cleaner specially formulated for opening drainage systems affected by black-waste deposits, water scale, rust, and mineral buildup.

Its powerful acidic cleaning action penetrates and dissolves inorganic deposits that restrict wastewater flow, helping restore the internal condition and performance of drainage pipes and sanitation lines.

UCA+ ACIDIC DRAIN OPENER is suitable for demanding marine, industrial, commercial, and general maintenance applications. This product is formulated and engineered in the USA.

APPLICATIONS:

- Black-waste drainage pipes and sanitation lines.
- Drainage systems affected by water scale and mineral deposits.
- Removal of rust buildup from compatible drain pipes.
- Marine toilet and wastewater drainage systems.
- Industrial and commercial drainage lines affected by inorganic deposits.
- Corrective cleaning of partially blocked drain and waste pipes.
- Routine maintenance of drains prone to scale and mineral accumulation.

DIRECTIONS FOR USE:

- Wear the recommended chemical-resistant personal protective equipment.
- Ensure that no other chemical or drain cleaner is present in the drainage system.
- Confirm that the pipe material is compatible with an acidic cleaner.
- Apply UCA+ ACIDIC DRAIN OPENER slowly and carefully into the affected drain.
- Use the product undiluted unless otherwise stated in the approved technical instructions.
- Allow the product to react with the deposits for the recommended contact time.
- Inspect the drain flow and repeat the treatment only when required.
- After the reaction has completely subsided, flush the system thoroughly with plenty of water according to the Safety Data Sheet.
- Check the drainage flow and repeat only if necessary.
- Never mix with alkaline cleaners, bleach, chlorine, ammonia, or any other chemical.
