UniClean America

Leader in Green and
ECO-Friendly Marine Chemicals

COMPANY OVERVIEW

Empowering Marine Operations With Innovation,
Sustainability, And Trusted Service.

ABOUT US

UniClean America is a leading USA-based manufacturer of high-performance marine and tank-cleaning chemicals, test kits, and eco-friendly DeepTech specialty solutions. With dedicated branches in Houston (USA), Ajman (UAE), and Dammam (KSA), plus strategic warehouses and trusted partners, we serve ports worldwide.

Our wide range includes marine chemicals for water treatment solutions for boilers, cooling systems, and RO units, fuel-oil treatments, degreasers, solvent cleaners, rig wash, oil spill dispersants, acidic cleaners, electro cleaners, tank cleaning and cargo cleaning chemicals, reliable metal treatment solutions, easy-to-use test kits for fuel and water analysis, and highly effective detergents for all your cleaning needs.

VISION & MISSION

VISION

To be a global leader in providing innovative and sustainable cleaning solutions for the marine, industrial, and commercial sectors while preserving the environment for future generations.

MISSION

To deliver high-quality, eco-friendly cleaning products and services tailored to the unique needs of our clients by integrating advanced technologies, fostering customer-centric innovation, and maintaining a commitment to sustainability and safety.

GOALS & OBJECTIVES

GROWTH

Strengthen our footprint across key international markets with reliable distribution, distributors and partnerships.

CUSTOMER SATISFACTION

Build long-term relationships by consistently exceeding client expectations in quality, safety, and performance.

ENVIRONMENTAL RESPONSIBILITY

Deliver innovative & sustainable solutions—provide eco-conscious marine and industrial chemicals aligned with global environmental standards.

WHY CHOOSE US?

OUR OFFERED SERVICES

Advanced Solutions. Cleaner Operations.
Stronger Ships. Safer Seas.

CHLORINATION

Clean, Safe Fresh Water Tanks Guaranteed

UniClean America provides expert chlorination services to thoroughly disinfect and sanitize freshwater tanks, ensuring your vessel's water is bacteria-free and compliant with the highest standards.

TOLL BLENDING

Custom Chemical Blending — Made to Fit Your Needs

From private label to specialized formulations, UniClean America offers complete toll blending services for marine and industrial chemicals, delivering quality products under your brand.

GO GREEN

with UniClean America

What is our DEEPTeCH SPECIALITY SOLUTIONS ?

Powered By Advanced Research And Development In The Sophisticated U.S. Laboratories, UniClean America Leads The Way In Sustainable Marine Solutions.

We Protect The Ocean, Safeguard Crew And Workers, And Replace Hazardous Marine Chemicals With **Eco-friendly Green Easy-to-use Alternatives.**

Our Next Generation **Fuel, Water, Metal, Rust, And Sewage Treatment Technologies** Help You Stay Efficient, Compliant, And Environmentally Responsible Without Compromising Performance.

UniClean America

Leader in Green and ECO-Friendly Marine Chemicals

DEEPTECH SPECIALTY SOLUTIONS

Marine Chemicals & Specialty Solutions for
Marine, Offshore & Industrial Operations

01

SPECIALTY CLEANERS

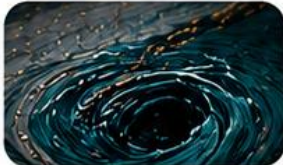

High-performance, eco-friendly cleaning solutions for marine, oilfield and industrial applications. Powerful results with environmental care.

ECOCLEAN HD

- Heavy-duty water-based biodegradable all-purpose cleaner and degreaser.
- Concentrated, eco-friendly, nonflammable.
- Free from acids, alkaline and solvents.
- Suitable for marine, oilfield and industrial use.

OSD ENVIRO CONCENTRATE

- Special oil dispersant with advanced American technology.
- Rapidly converts oil slicks into very small droplets.
- Supports biodegradation.
- Nonflammable, neutral pH, solvent-free and completely biodegradable.

MARISOL AQUABREAK

- Powerful non-caustic alkaline degreaser.
- Reduces multiple cleaners to one solution.
- U.S.-made, biodegradable and compatible with most metals.
- Ideal for marine, tank cleaning, oilfield and industrial applications.

ECOCLEAN SOLVE PLUS

- 100% active and biodegradable.
- Highly concentrated, solvent-free and environmentally responsible.
- Ideal for tank & cargo cleaning, heat exchangers, component soaking and filter cleaning.
- Effective for industrial & marine degreasing of oils, asphalt, tar, synthetic resins and distillation residues.

02

RUST TREATMENT SPECIALTY

Advanced rust removal, conversion and protection solutions. Stronger performance, safer for people and the environment.

NEUTRAL DE-SCALE & RUST ECO

- Unique non-acidic formula.
- Removes rust and scales better than traditional descalers.
- No acids, fumes or smell.
- Safe for all metals, non-corrosive.

LATEX RUST CONVERTOR PRIME

- Reacts with rust to form a stable protective layer.
- Passivates and primes the surface.
- Enables paint and coating application.
- Ideal for rust treatment and surface preparation.

ENVIROACID HD

- Bio-degradable organic acid alternative.
- Removes rust and scales without burns or harmful fumes.
- No harsh acidic smell.
- Safer to use than traditional chemicals.

ECO-FRIENDLY

Sustainable formulations for a cleaner future.

HIGH PERFORMANCE

Powerful results with proven reliability.

SAFE & RESPONSIBLE

Non-hazardous, safe for people and the environment.

MARINE & INDUSTRIAL

Engineered for demanding marine, offshore and industrial applications.

UniClean America

Leader in Green and ECO-Friendly Marine Chemicals

3 WATER TREATMENT SPECIALTY

State-of-the-art water treatment and corrosion control solutions for cooling systems and storage tanks.

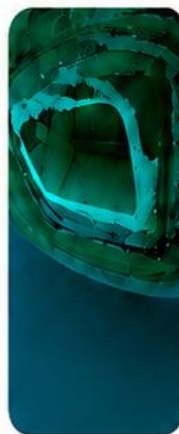

CWT NCLT

- Corrosion inhibitors and special polymers.
- Unique self-indicating method for timely dosage and testing.
- Cost-effective.
- Reduces labor time.

BWT ORGANIC

- One-shot treatment with special acrylic polymers.
- The ONLY chemical that creates a rust and corrosion preventive black film.
- Protects the inside surface from further corrosion.

ECOSPERSER PLUS

- Unparalleled protection against marine growth and corrosion.
- Free from biological fouling.
- Eco-friendly, biodegradable biocide solution.
- For cooling systems and storage tanks.

4 SEWAGE TREATMENT SPECIALTY

Advanced biological treatment solutions for marine sewage systems. Cleaner operation, better hygiene and efficient biodegradation.

MICROZYME LIQUID

- Ready-to-use liquid sewage treatment formula.
- Blend of aerobic bacteria designed to digest contamination.
- Helps reduce health hazards and system blockage.
- Improves hygiene and system performance.

ENZYME POWDER

- High-performance powder sewage treatment formula.
- Blend of aerobic bacteria for faster biodegradation.
- Packed in water-soluble bags for easy dosing.
- Delivers 8x strength and performance.

ECO-FRIENDLY

Sustainable formulations for a cleaner future.

HIGH PERFORMANCE

Powerful results with proven reliability.

SAFE & RESPONSIBLE

Non-hazardous, safe for people and the environment.

MARINE & INDUSTRIAL

Engineered for demanding marine, offshore and industrial applications.

UniClean America

Leader in Green and ECO-Friendly Marine Chemicals

5

FUEL ADDITIVE SPECIALTY

Performance fuel treatment additives for lubricity, combustion efficiency and biocontrol in marine fuel systems.

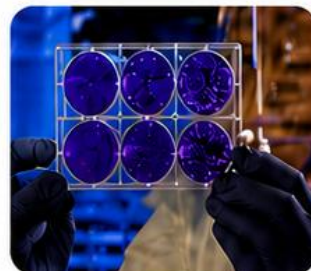

FOT LUBRICITY IMPROVER

- Special blend of surfactants and additives for low sulphur fuel oil.
- Increases lubricity and maintains fuel stability.
- Helps inhibit corrosion and disperse sludge.

FOT DUAL PURPOSE

- American-made combustion catalyst and fuel stabilizer.
- Reduces soot and improves combustion.
- Disperses sludge and stabilizes fuel in one step.

FOT BIOCONTROL

- Treats bacteria, algae, yeast and other microbes in fuel and oil.
- Stabilizes the fuel and is miscible with oil.
- No reports of microbial immunity development.

6

PICKLING & PASSIVATION SPECIALTY

Professional stainless-steel cleaning, pickling and passivation solutions for fabrication, maintenance and surface restoration.

METAL CLEANER & BRIGHTENER

- Removes grime, grease, oil, scale, lime and rust in one step.
- Heavy-duty stainless-steel cleaner formulated in the USA.

PICKLING LIQUID

- Removes rust, scale and oxide layers from stainless steel.
- Formulated and engineered in the USA.

PICKLING GEL / PASTE

- Targeted removal of rust and scale on stainless steel.
- Ideal for localized treatment and vertical surfaces.

PASSIVATION LIQUID

- Cleans and protects stainless-steel surfaces.
- Restores a protective passive layer.

ECO-FRIENDLY

Sustainable formulations for a cleaner future.

HIGH PERFORMANCE

Powerful results with proven reliability.

SAFE & RESPONSIBLE

Non-hazardous, safe for people and the environment.

MARINE & INDUSTRIAL

Engineered for demanding marine, offshore and industrial applications.

UCA+ LATEX RUST CONVERTOR PRIMER COAT METALLO-ORGANIC RUST CONVERSION

Product description: an innovative product formulated to reduce rust preparatory preparation rust early conversion (stabilizing) coating primer base coat start protective undercoating/topcoating coats IDEALS.

Transportation: Non-Regulated

Safety precautions:

- Inhalation: move to fresh air.
- Skin contact: rinse with water.
- Eyes: flush with plenty of water. Get medical attention if irritation persists.
- Ingestion: contact medical personnel, or physician if necessary.

Product highlights:

- 2-in-1: Treats corrosion + forms durable adhering priming.
- Latex base.
- Low odor, sea-friendly, water-based, industrial & household.
- Compatible/overcoat properties.
- Zero flash point: Easy to VOC.

Using directions:

Surfaces must be clean, dry and free of grease, paint, oil and loose rust. Apply at recommended thickness by brush, roller, or spray. Allow to dry at least 40 hours before overcoating. Keep container sealed and tightly closed.

SAME DESCALING CHALLENGE. A MODERN WAY TO HANDLE IT.

Modified HCL, Muriatic Acid (UCA+ ENVIROACID HD)

Work in Comfortable and Safe Circumstances where
No Ventilation, Face Mask and Gloves required.

Your industry depends on HCl / muriatic acid—but why keep suffering from the harsh smell and heavy fumes of regular acid? UniClean America introduces UCA+ ENVIROACID HD, a modern modified HCl / muriatic acid solution designed to remove scale, lime, rust, cement and stubborn mineral deposits with a more practical handling profile for industrial use.

Virtually

APPLICATIONS & USES BY INDUSTRY

1 WATER TREATMENT

- Applications: Boilers, heat exchangers, chillers, cooling towers, evaporators, pipelines.
- Use: Removes scale, lime, rust, hardness and mineral buildup to improve flow and heat-transfer efficiency.

2 WASTEWATER TREATMENT

- Applications: Waste treatment plants, pipelines, drainage systems, sewer manholes.
- Use: Cleans drainage lines and helps dislodge black waste, scale and hard deposits to maintain smooth flow.

3 MARINE & SHIPPING

- Applications: Seawater cooling systems, engines, boilers, evaporators, cargo hold tanks, shipyard, ship repair.
- Use: Helps remove lime, rust, hardness, scale and deposits buildup in marine equipment and ship repair environments.

4 TANK CLEANING

- Applications: Cement tanks, lime tanks, storage tanks, process tanks, ship tanks, cargo hold tanks.
- Use: Cleans ship tanks and cargo hold tanks and dissolves cement, lime, scale, rust and stubborn residues.

5 CEMENT INDUSTRY

- Applications: Equipment, trucks, mixers, chutes, tools, buildings, concrete surfaces.
- Use: Removes cement splashes, hardened cement, mortar and lime residue from industrial and construction surfaces.

6 OILFIELD INDUSTRY

- Applications: Pipelines, tanks, heat exchangers, cooling towers, field equipment, process systems.
- Use: Removes scale, rust and mineral deposits to support cleaner, more efficient industrial operations.

UCA+ ENVIROACID HD HEAVY DUTY BIODEGRADABLE ACID CLEANER

Product Benefits: Works in low concentrations compared to conventional acids. Safe for industrial use and user environment. Removes scale, lime, rust, corrosion, oil, grease and other stubborn deposits. No need for ventilation, face mask or gloves while handling. Non-regulated acid, safe for storage, handling and use.

Recommended For Cleaning:

- Heat Exchangers
- Process Lines/ Systems
- Pipelines
- Tanks, cargo manifolds
- Cooling towers/ condensers/ piping
- Evaporators/ drive systems/ engines
- Pre-treated cleaner

(Consult your engineer for use and guidelines)

Form For Dilution

- Please use with dilution of the solution as specified below
- Prefer dilution with fresh water before using

RECOMMENDED DILUTION RATIO (N/V)

CONCENTRATIONS	DILUTION
Light Cleaning	5:1 to 10:1
Moderate Cleaning	3:1 to 5:1
Heavy Cleaning	2:1 to 3:1
Severe Cleaning	Undiluted

Made in the USA / Ship from the USA

UniClean America

Leader in Green and ECO-Friendly Marine Chemicals

POWERFUL ECO CLEANING. ONE SOLUTION. MANY APPLICATIONS.

UCA+ ECOCLEAN SOLVE PLUS

100% ACTIVE CLEANER

100% Active Heavy-Duty Cleaner for Carbon, Oil, Sludge & Tank Cleaning

UCA+ ECOCLEAN SOLVE PLUS is a next-generation eco-friendly heavy-duty cleaner engineered to replace multiple cleaning chemicals with one powerful solution. Its high-solvency biodegradable formula effectively removes carbon deposits, varnish, fuel residues, mineral oils, crude oils, asphalt, black tar, synthetic resins, sludge, and heavy contaminants for marine and industrial cleaning applications.

100%
Active

Biodegradable
Formula

Multi-Purpose
Cleaner

Removes
Carbon & Sludge

Safe on
Common Metals

American-Made
Formula

WIDE RANGE OF APPLICATIONS

TANK & CARGO CLEANING
For vegetable, fish, animal & mineral oils, CPP/DPP cleaning, deep tanks, DB tanks & bilges.

HEAT EXCHANGERS
Suitable for off-side cleaning of fuel heaters and coolers.

COMPONENT SOAKING
For pistons, valve cages, injectors, burner tips and carbonized parts.

FILTER CLEANING
Removes carbon, sludge and varnish from fuel and lube oil filters.

INDUSTRIAL & MARINE DEGREASING
Removes asphalt, tar, synthetic resins and distillation residues.

TANK CONVERSION & SYSTEMS
Suitable for most MARPOL Annex I & II cargoes and DPP to CPP cleaning programs.

WHY CHOOSE UCA+ ECOCLEAN SOLVE PLUS?

- ✓ Highly concentrated 100% active biodegradable cleaner.
- ✓ Replaces multiple cleaners with one powerful solution.
- ✓ Removes carbon deposits, varnish, oils, sludge and heavy residues.
- ✓ Safe on stainless steel and epoxy coatings.
- ✓ High-solvency performance with fast rinse and quick gas-free results.
- ✓ High flash point and non-flammable handling.
- ✓ Suitable for marine tank cleaning, machinery cleaning and degreasing.
- ✓ Formulated and engineered in the USA.

UCA+ ECOCLEAN SOLVE PLUS helps simplify cleaning operations by replacing multiple chemicals with one powerful biodegradable solution for tank cleaning, degreasing, carbon removal and machinery maintenance.

TEST KITS & MONITORING SOLUTIONS

Professional test kits for water quality, oil condition and sewage effluent monitoring.

01 POTABLE WATER TEST KIT

Specially designed to offer offshore rigs and sea vessels a monitoring solution for essential potable water parameters with high accuracy. A complete kit made in line with IMO regulation standards, including dip-slides for testing several grades of bacteria and E. coli.

Aluminium brief-case includes instruments for measuring:

- Chlorine Comparator Disc and Tablets
- PH Digital Meter
- Conductivity / TDS (Total Dissolved Solid) Digital Meter
- TTC Bacteria Test
- Turbidity Check
- Temperature Meter
- Total Hardness Test
- E.Coli Coliform Test
- *Pseudomonas* Species

02 OIL TEST KIT

Exclusively manufactured by UniClean America, this U.S.-developed oil test kit provides reliable and accurate indication of performance and quality for engine oil, fuel, lube oil and oil at any given time on-site.

Oil Kit No. 5

- Water-in-oil Test
- Base Number Test
- Viscosity Test
- Spot Test
- Salt Test

Oil Kit No. 3

- Water-in-oil Test
- Base Number Test
- Viscosity Test

Cleaner solution, BN reagent and WIO reagent sets are also available individually. For best accuracy and dependable results, always use genuine UniClean America reagents.

03 SEWAGE EFFLUENT TEST KIT

A specially designed high-accuracy test kit that checks the quality of treated wastewater before it is released back to the environment. An essential onboard solution to help ensure regulatory compliance and protection of public health.

Parameters measured include:

- Permanganate Value
- pH Value
- Temperature
- Probable BOD, COD and TOC
- Turbidity (SS)

TEST KITS & MONITORING SOLUTIONS

Professional test kits for water quality and bacteria monitoring.

01 TABLET-METHOD TEST KITS

This type of test kit uses pre-measured reagent tablets to give quick, reliable readings with minimum preparation.

- Boiler Water Test Kit (P-Alkalinity, Chloride and pH values)
- Cooling Water Test Kit (Nitrite, Chloride and pH values)
- Nitrite Test Kit
- Chloride Test Kit
- P-Alkalinity Test Kit
- Hardness Test Kit
- Phosphate Test Kit
- Chlorine Test Kit
- Iron Test Kit

Tablet replacement available for Nitrite, Chloride, P Alkalinity, M Alkalinity, Phosphate, and Hardness.

02 DROP-TEST KIT

A UniClean America original special test kit developed in the U.S.A. that measures parameters using only a drop instead of a tablet, making it easier, safer, more economical, and highly accurate. Quick and easy to use.

Available testing parameters include:

- P Alkalinity Drop Test Kit
- Nitrite Drop Test Kit
- Chloride Drop Test Kit
- Sulphite Test Kit
- Hydrazine Test Kit
- DEHA Test Kit

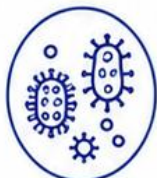

03 BACTERIA DIP-SLIDES

DIP-SLIDES test kits provide a fast, low-cost way to check bacterial or fungal levels in fluids such as water, fuel, and coolants without sending samples to the laboratory. UniClean America offers a versatile range tailored for specific applications and faster results under short incubation periods.

Available DIP-SLIDES include:

- **TTC/E.COLI:** Allows convenient enumeration of aerobic bacteria (TVC) together with *E.COLI*, coliforms, and *Pseudomonas* spp. in a single test.
- **TTC/PDM:** Total viable cell count (TVC) of aerobic microorganisms on the nutrient/TTC medium and enumeration of *Pseudomonas* species on the *Pseudomonas* differential medium (PDM).
- **TTC/TTC:** Standard bacteria test used for general-purpose cultivation of organisms obtained from surfaces, fluids, or air.

UniClean America operates on a global scale, delivering marine chemical solutions to vessels and facilities in over 50 major ports worldwide. Through a network of trusted partners, we provide consistent service and quality to ship owners, ship managers, shipyards, chandlers, offshore operators, and marine service companies across continents.

We are also a trusted partner to industrial cleaning contractors, terminal operators, and marine HVAC and water treatment professionals looking for reliable supply and documentation that aligns with international regulations. Wherever your operations take you, we are here to ensure your needs are met with speed, precision, and a personal touch.
